

# About Us

We didn't create STL Warehousing.

Our customers did.

Yes, we decided on the business name and incorporated the company, etc., but the essence of the business evolved out of real customer needs.

It all started in 2006, when several customers of our logistics consulting business asked us to recommend a warehouse (3PL) provider to accommodate their specific needs.

## Features:

- We combined the best technologies with Lean warehouse processes
- Then we went to market
- Satisfied that our solution was a best - practice, repeatable approach, we offered it to all-comers
- We now manage your warehouse or out-source your warehousing and distribution function, we will help you:
  - ◆ Improved inventory accuracy;
  - ◆ Reduced total operating costs; and
  - ◆ Increase customer satisfaction.
